Your wedding memories are too important to risk

You get only one chance to capture the magical memories of your wedding. From the bride's walk down the aisle, to the happy couple leaving the reception, to all those subtle, special moments in between.

That poignant glance. His gentle touch. Her joyful tear.

Anticipating and capturing all of these elusive moments takes **experience, sensitivity and artistry**. The exact qualities you'll find in the video professionals at Via Vision.

What other couples say:

"I've never been so happy!! You really know how to capture every moment of our day."

"We could not be more pleased. Thank you for exceeding our expectations!"

"Delighted with your personal, yet professional service... and your state-of-the-art technology."

"Wow! Our video is amazing! There were so many things I missed that you weaved together perfectly!"

Your wedding is magically transformed into a movie - a mix of sights, sounds and emotions that tell the complete story of your special day from beginning to end. It will delight and move you and your loved ones for decades to come.
